

Dive Dynamics Recovery / Tool Harness DD15 |

The Dive Dynamics DD15 Harness is a parachute style harness utilising heavy duty webbing and stainless steel D-rings.

This streamlined design has the essential features of a sound lifting harness including:

- Parachute leg straps with infinite length adjustment
- The strap tails are neatly stored out of the way by the use of Velcro – no annoying loose strap ends.
- Waist strap with infinite adjustment fitted with stainless steel D-rings
- Shoulder straps with infinite adjustment fitted with stainless steel D-rings
- Rear lifting point with a heavy duty stainless steel triangle positioned at the top back of the harness
- Tool and umbilical attachment points
- Fixed eyelets positioned for standard cylinder bands attachment

- **Simple recovery harness**
- **Fully adjustable straps**
- **Tested and approved in accordance with PPE Directive (CE Certified)**
