

## Nuclear Solutions

VEOLIA Nuclear Solutions Division are manufacturers and suppliers of high integrity equipment and services to the nuclear industry. The company provides a comprehensive range of services including the design and supply of customized manipulator and robotic systems for decommissioning and clean up activities, robotics and specialized waste treatment equipment.

Veolia's Nuclear Solutions are a world leader in nuclear facility clean-up and treatment of low and intermediate level radioactive waste.

We bring unique expertise and a broad range of capabilities in the nuclear clean-up field, including:

Customized design and build of manipulators for site clean up and decommissioning activities such as tank active sludge removal, shaft or pit clean out activities, remote cutting and disassembly of reactors and other plant and equipment.

The treatment of low and intermediate level radioactive wastes using the GeoMelt process for the processing of spent fuel and sludges.
